

Insight® Docs Canada

Give your U.S. suppliers the tools they need to easily create and transmit their Canadian export documents.

Mistakes, omissions or lost paperwork are common causes of delays and compliance problems at the border.

Insight Docs Canada can help. It's a secure, easy-to-use tool that allows your suppliers to easily prepare, transmit and manage their Canadian export paperwork.

Our Insight Docs Canada technology solution

Your supplier simply logs on to the secure Insight Docs Web site from any PC to gain access to their stored database of products, consignees and document templates.

Your supplier can then easily create all the documents needed for their cross-border shipments to you, including:

- Canada Customs invoices
- Bills of lading
- Manifests
- NAFTA certificates.

The system's built-in customs compliance features watch for common errors and missing information, and help suppliers make corrections before they become a problem at the border

Once completed, export paperwork is produced in PDF format for easy printing, emailing and storage. The shipment data is also instantly transmitted to our system to ensure not only the fastest possible clearance but also that Canadian Customs' pre-arrival reporting requirements are met.

How you'll benefit

- Accurate documents help ensure your compliance. Insight Docs Canada will alert your suppliers if it detects missing or potentially incorrect information.
- Save time. By storing their product and consignee information in Insight Docs, your suppliers can quickly and easily create their export documents.
- Better reliability. Accurate and complete customs documents will help eliminate uncertainty at the border.
