

## Insight® ISF

Collaborate with your overseas suppliers and manage your 10+2 Importer Security Filings (ISF) online with Livingston's Insight ISF.

The implementation of 10+2/importer security filings has changed the way your company does business overseas. Under new regulations, you must report 10 data elements to U.S. Customs prior to your vessel being loaded. With significant penalties possible for non-compliance, accurate and timely reporting is essential in ensuring your goods arrive when you want them to. Livingston's Insight® ISF provides the solution.

### Our Insight ISF technology solution

Insight ISF is a web based application that allows you and your overseas suppliers to manage and submit all ISF data. Once all the information is available, the application can be used to send the ISF data to Livingston where we can validate and submit to U.S. Customs. You also have access to track progress and status updates on the system's main dashboard screen.

### Key features of Insight ISF

- Provides online access to you and your suppliers and partners, accessible any time from any computer with internet access.
- Strict and customizable security profiles allow you to control access and limit the amount of visible data to overseas suppliers/partners when they submit their data.
- Customized data integration with your in-house or enterprise system pulls information and populates your ISF. Coupled with our template functionality this eliminates the need to re-type data and ensure accuracy.
- Dynamic notification system sends e-mail messages to the necessary people in your supply chain to inform the status of their ISF, and request data.

- Advanced system edits and built in validations ensure the accuracy of transmitted data.
- Customs (CBP) filer code provided by Livingston as part of the technology solution, which means you do not need to maintain your own for ISF filings.
- No system set-up or minimum monthly charges in a typical Insight ISF implementation. With a variable cost structure, your fees are based on your usage.

### How you'll benefit

- Save time. Have your suppliers enter information for you directly into the application.
- Improve compliance. Built in validations and system checks between the ISF and entry information helps ensure ongoing compliance and uniformity.
- You are in control. Robust security profiles allow you to configure who can have access to what information - keeping your critical information confidential and secure.

### About Livingston

Over 30,000 companies trust Livingston with their customs brokerage, consulting, freight and integrated logistics needs.

Livingston is North America's most innovative and knowledgeable customs broker. We offer a full suite of advanced technology solutions to help clients manage their imports and compliance.

### Next steps
